Over 16,500 kWh	\$.05486

Demand Charge (per kW)

0 – 15 kW	\$1.50
16 - 1000 kW	\$6.50
Over 1000 kW	\$7.50

Conditions of Service

1. Application

This General Service Rate Schedule and rates shall apply to all other single and three phase electrical services except as provided by Schedule L-RES-1 (Residential) and Schedule L-IND (Industrial). Any combination of General and Residential Service shall be charged at the General Service L-GS-1 rate unless the residential portion of the load is separately wired and metered.

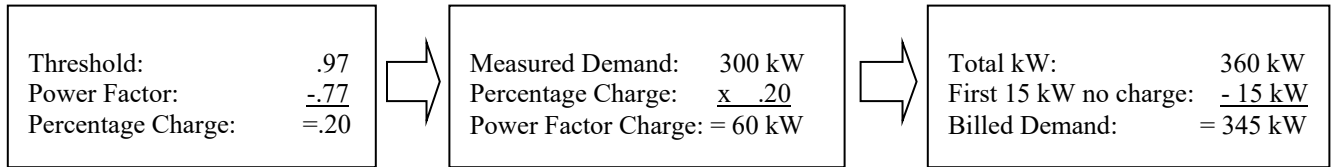

2. Power Factor Cost

Power factors less than 0.97 will incur an additional charge at the discretion of MW&L. The general service customer will be notified of a power factor below .97 and mitigating measures they may take. Power factor charges will be calculated as follows:

Power factors less than the .97 threshold will be subtracted from .97 to derive a percentage charge. The percentage charge will then be multiplied by the current

month's measured demand. The resulting figure from the previous equation is then added to the measured demand figure and billed at the normal demand-billing rate.

Example with a Power Factor of .77 and measured demand of 300 kW:

3. Exceptions

Demand charges will not apply to non-profit, outdoor lighted facilities on stand alone meters, that are available to the community.

4. Temporary Service Rates

Shall be the same as General Service rates above, plus all costs of installation and removal of the equipment provided for the temporary service.

5. Non-Residential Construction Rates

Shall be the same as General Service rates above.

6. Installation Fees

All General Service customers will be charged the associated installation and transformation expenses.

7. Additional Terms and Conditions

Additional rules and regulations for this service are found in the *McMinnville Water & Light Customer Policies*.
