| Over 5,000 kWh | \$.05001 |
| Demand Charge (per kW): | |
| 0 – 30 kW | \$4.50 |
| Over 30 kW | \$5.80 |

Conditions of Service

1. Definition

The term *Irrigation Customer* pertains to electric customer accounts whose primary function is to service agricultural irrigation pumps and/or accounts that are limited to any process associated with agricultural watering.

2. Power Factor Cost

Power factors less than 0.97 will incur an additional charge at the discretion of MW&L. The customer will be notified of a power factor below .97 and mitigating measures they may take. Power factor charges will be calculated as follows:

Power factors less than the .97 threshold will be subtracted from .97 to derive a percentage charge. The percentage charge will then be multiplied by the current month's measured demand. The resulting figure from the previous equation is then added to the measured demand figure and billed at the normal demand-billing rate.

Example with a Power Factor of .77 and measured demand of 300 kW:

3. Seasonal Reconnect Charge

An Irrigation Seasonal Reconnect Charge will be applied at the time of reconnection to those irrigation customers that disconnect and then reconnect their irrigation service within a 12 month period. This charge is listed on the Miscellaneous Charges rate schedule L-MISC-1.

4. Additional Terms and Conditions

Additional rules and regulations for this service are found in the *McMinnville Water & Light Customer Policies*.
